Gesu Pre-K Philosophy

We believe it is our responsibility to take children where they are and foster them to where they need to grow. Each child will be seen as an individual and lessons will be set to meet each child's personal needs. All activities will be based on Developmentally Appropriate Curriculum and quality interactions between children and the adults who care for them.

We also believe that...

WE ARE...

...rooted in Christ!

Our Pre-K program follows the basic concepts such as loving God, ourselves, our families, our friends, and all living things.

...academically based through play!

Children learn best through doing. Play helps them make sense of the world around them in a way that is most meaningful to them. Weaving academics into their play helps them learn basic Math, Science, Social Studies, and Language Arts concepts in a fun way; making their "work" purposeful to them.

...building a strong foundation!

Our goal is to work with parents to ensure that together we are laying a strong foundation so that your child's success grows with them well beyond Pre-K.

...GESU

Curriculum

In Pre-K we use multiple curriculum tools.

Creative Curriculum: Looks at the whole child; providing lessons to foster their social, emotional, physical, cognitive, and language development through play based centers.

Happily Ever After: A Reading Readiness Program that lays a foundation to help your child begin the reading process.

Stories of God's Love: Is a bible based program that works on connecting God's love to everyday life.
